Date	Time	Level at Green Lake	Rain in 24 hours at Green Lake	Level at Dam	Rain in 24 hours at the Dam	Feet from 1543.10 at Green Lake	Comments
30-Apr	7:00 AM	1542.5	2.9 in past week			0.60' or 7.2" below	We had just under 3" of rain in the past week which raised the lake 3' with the dam wide open. The lake came up over summer level and now has receded to 7.2" below summer level. The ice is still on the lake. I predict the ice will go out Thursday of this week.
1-May	7:00 AM	1542.18	0			0.92' or 10.31" below	I predict the ice will go out Saturday of this week.
2-May	7:00 AM	1541.9	0			1.20' or 14.4" below	
3-May	7:00 AM	1541.7	0			1.40' or 16.8" below	
4-May	7:00 AM	1541.49	0			1.62' or 16.34" below	The ice went out of West Lake and Green Lake yesterday and Canada Lake last night. There are still a few ice crystals floating down by the store but pose no danger to property. We would like to get the dam closed today if possible. We are 2 or 3 weeks behind our normal ice out and have a lot of work to do before Memorial day weekend. It is going to be a very short season for us as the lake is scheduled to be drawn down by September 10 which is 2 months early.
7-May	7:00 AM	1540.9	0			2.20' or 26.4" below	DEC scheduled to close dam today

17-Jul	7:00 AM	1543.04	0.5			0.06' or 0.72" below	<p>Bottom gate is closed and top gate is open 1"+ Work has begun on jack hammering concrete on the down stream exit of the bottom gate and removal of the railing and walkway at the top of the dam. The water is at the top of the flash boards and spilling over about 50% of the boards. If this level can be maintained until the September 10, 2018 it would allow for normal summer recreation on the lake to continue and facillitate a practical means to remove all the water craft from the lake before the scheduled September 10, rapid drawdown.</p>
